In less than 100 words, briefly describe what you hope to achieve in the next five years, and the type of Organisation you wish to work in.

In the near future, I hope that after my probation time, I will be able to work abroad in different countries where I can gain more knowledge, relationship and world culture.

Of course, the first place I want to work is Singapore where the founder established company. And after that, Australia is my expected destination because Australia is an united state where I can interact with various people coming from all over the world in order to challenge my self and become expert in my career.

Draw the organization chart of your current/ most recent organization that you have worked in. Indicating your relationship of your position to your department.

Employment History (in chronological order, starting with the most recent employer)

Name of Employer	Ton Tan Luc	From (Date)	20/10/2016
Address of Employer	Huynh Tan Phat Street, Phu My Ward, District 7, Ho Chi Minh city, Vietnam	To (Date)	Now
		Commencing Salary	\$700 USD
		Current/ Last Salary	\$850 USD
Starting Position	Embedded Engineer	Current/Last Position	Embedded Engineer

Brief Description of Duties & Responsibilities

- Creating and modifying driver for chip using C language.
- Making test program to test the stability of chip during operation.
- Working with project Management Tool such as JIRA, Redmine
- Taking responsibility for complete GPIO module

Reasons for Leaving The time for coding just take a little, and almost the phase was creating test and make description documents. In my opinion, this work was repetitive (and often boring)

Name of Employer	Nguyen Thi Thanh Tra	From (Date)	10/2014
Address of Employer	Le Van Tho Street, Ward 9, Go Vap District Ho Chi Minh city, Vietnam	To (Date)	10/2016
		Commencing Salary	\$600 USD
		Current/ Last Salary	\$700 USD
Starting Position	Embedded Engineer	Current/Last Position	Embedded Engineer

Brief Description of Duties & Responsibilities

- Design PCB components <Altium>
- C/C++ : Program for embedded system using ARM, AVR, PIC, ESP family <Keil C, IAR>
- Python : Work with Linux on Raspberry Pi.
- Java : create simple application on Android to test the communication between mobile device, embedded system and web server using basic PDO query

Reasons for Leaving Company didn't have effective projects, therefore they decided to change the company's orientation to sell imported automotive devices instead of developing new ideas.

My Strengths

My strength is my flexibility to handle change. As Embedded Engineer at my last job, I was able to work under pressure when I had many deadline in short term.

My Weaknesses

As far as weaknesses, I feel that my private working plan management skills could be stronger, and I am constantly working to improve them.

Why should I be selected for the position

I possess a combination of skills and experiences making me feel confident at this job position. In addition, dynamic and extrovert character makes me easily to connect and create relationship with people around.

Any other comments to support my application
